

The image is a detailed architectural site plan of a city block in Berlin. The plan shows several buildings, streets, and various annotations. The buildings are labeled with numbers and names: 1110 (Pflanzengarten AG), 1112 (Mietwohnheim), 1113 (Mietwohnheim), 1114 (Mietwohnheim), 1119 (Mietwohnheim), 1371 (Eisenbahnkantine), 1083 (Kommunales Wohnhaus), 3263 (Altenheim), 3264 (Bürogebäude), 3265 (Personenverkehr), 3894 (Kommunales Wohnhaus), and 1083 (Kommunales Wohnhaus). The streets shown are Bogenschützenstrasse, Schanzstrasse, and Oranienburgerstrasse. The plan also features a blue dotted line indicating a specific boundary or path, and various other annotations in German and English.

This architectural site plan illustrates the proposed tram line (indicated by a blue dotted line) through the Bubenberglane station area in Zurich. The plan includes the following details:

- Station Area:** The central focus is the station platform and surrounding infrastructure, including the existing tram stop and the proposed tram line.
- Surrounding Buildings:** Various buildings are shown, including the existing tram depot (Bubenberglane) and the proposed tram depot (Bubenberglane).
- Infrastructure:** The plan shows the existing tram line, the proposed tram line, and the surrounding infrastructure, including the tram stop and the tram depot.
- Topography:** The plan includes a topographic map of the area, showing the existing terrain and the proposed tram line.
- Legend:** A legend is provided in the bottom left corner, defining the symbols used in the plan, such as the tram line, the tram stop, and the tram depot.

The plan is a detailed technical drawing, likely used for planning and construction purposes. It shows the layout of the tram line, the station platform, and the surrounding buildings and infrastructure. The blue dotted line represents the proposed tram line, while the solid lines represent the existing infrastructure. The plan also includes a topographic map and a legend to help understand the symbols used.
